

Individual assignment Second semester

ITRI 624

With the use of Questionnaires (on efundi), on no more than five (5) pages, comment on:

1. Whether Software Development become an integral part of Project Management in South African Software Development Organisations, and where does software development fit into project management?
2. Which Project Management and Software Development methodologies are used mainly by South African Software Development Companies, and why?

Finally, in no more than two (2) pages, debate what you believe to be the Best PM and Software Development Methodologies to use by the Computer Science and Information Systems Department and why you came to such a conclusion.

As such, you set out to interview **10** Software Development Companies in the South African IT Industry.

Remember to add your questionnaires (employees' answers) as an Appendix and enter each recorded answer to the google form.
